

Simply exact.

PRECISE MEASUREMENT TECHNOLOGY FOR GRAVURE CYLINDERS

DiaMet

Determination of circumference and diameter

DuroMet

Measurement of copper and chrome hardness

HelioMet

Determination of engravability

Rz-Star

Measurement of roughness

Thickness-Star FE

Measurement of copper layer thickness

MicroMet

Measurement of chrome layer thickness

Simple. Fast. Reliable.

Innovative measurement technology for use under production conditions makes a vital contribution to quality assurance. Our extensive portfolio of measurement instruments provides optimal solutions for widely diverse gravure printing needs. You benefit from tools that are simple to operate and return reliable, precise, fast and reproducible results.
